### WINGLESS 600 MICROS

These micros have a 600cc motorcycle engine that can be bored out to 636. These cars are modeled after their big brothers, the Sprint cars, and are self-starting.

### 270 MICROS

These cars are powered by 250cc motorcycle engines that are bored out to 270. They are also modeled after Sprint cars, but need to be push started.

### 4 & 8 CYLINDER ENDUROS

Stock Front or Rear wheel drive cars off the road with safety features.

### SLINGSHOTS

These scaled down mini modified racecars feature an alcohol burning, Briggs & Stratton V-twin power-plant. These racecars are capable of speeds over 80 mph and are designed for 1/8-1/4 mile speedways. Many racing superstars have cut their teeth in the slingshots division.

Bridgeport Speedway provides a safe and secure family atmosphere, free parking, handicap accessibility, giveaways, and fan participation games.

## SKYBOX RENTALS & BIRTHDAY PARTY FAMILY PACKAGES AVAILABLE ONLINE.

As a premier racing complex, Bridgeport Speedway is a banked 5/8th mile dirt oval, featuring Spirit Auto Center Speedway, a 1/4 mile oval embedded in the center, located in Southern New Jersey — just minutes from Pennsylvania and Delaware at exit 14 off of I-295.

GPS COORDINATES: 83 FLOOD GATE ROAD  
SWEDESBORO, NJ 08085

(RAIN DATE: WILD CARD NOV 12)

## BIG BLOCK MODIFIEDS

The mighty modifieds with 467 cubic inch motors serve as Bridgeport Speedway's headline class. If you love the Big Blocks Bridgeport Speedway is the only track in New Jersey to feature them on a weekly basis.

## CRATE/SPORTSMAN

Drivers in this highly competitive division can use 358 cubic engine with a 2 barrel carb or a 350 - 400 block crate engine (Ford or GM) to motor around the clay oval. This class fits the pocketbook of all weekly racers and many advance into the Big Block Modified division.

## OUTLAW STOCKS

A full bodied stock car that represents the late models of yesterday. Most of these chassis are from the 80's model cars such as Monte Carlos and Camaros that dominated the race tracks of the 1970's. Don't be fooled, these guys can fly, and some of the tracks most experienced and seasoned drivers buckle in to do battle each week in the Outlaw Stock division.

## SPRINTS

Sprint cars spend most of their time scrambling for traction, broad sliding around the corners, wheelstanding on the straights, and throwing clay into the stands; all while reaching speeds up to 140 mph. 900 horsepower is commonplace for these machines, which typically have a 410, 360, or 305 cubic inch engines and are fueled by methanol. With no starter, sprint cars must be push started.

### WHAT ARE YOU DOING THIS WEEKEND?

### FUN FOR THE WHOLE FAMILY!

### COMMUNITY MINDED & CARING

### MONSTER TRUCK THROWDOWN
